

[DRAFT] Data Sheet E – Results of Internal Review Committee

Date of Review/Recommendation: December 9, 2010

Water Body Under Evaluation:

Water Body ID #: 0781
Name: Hurricane Creek (Class C)
Length of Segment: 3.8 miles
County (ies): Howard

Use Attainability Analysis (UAA) Study:

UAA ID #: 0983
Submitter: MEC Water Resources
Date(s) Conducted: September 11, 2008
Date Received: October 17, 2008
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
☐ 3-Non-Remedial, Human Caused Condition.
☐ 4-Hydrologic Modifications.
☐ 5-Natural Physical Features.
☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown

Comments: The UAA survey was conducted in September 2008 and no evidence of WBCR was observed. There were multiple sightings of footprints along the stream segment which is consistent with the 2005 UAA. No interviews were conducted.

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: The stream met the maximum depth criterion at 2 of 3 sites. Because the maximum depth criterion was met, the committee recommends that the WBCR use be retained. Due to evidence of secondary contact recreation (SCR), the committee recommends that the SCR use be assigned.

Committee Recommendation:

☐ Add Use ☒ Retain Use ☐ Remove Use
☐ Modify Use ☐ Inconclusive
